PRODUCT DATASHEET

USB Type-A to Micro-USB Cable • 30 cm

A compact USB cable designed to connect a USB Type-A host or power source to a compatible device with a Micro-USB Type-B receptacle. Intended for data transfer and/or power delivery, depending on the cable construction and the connected equipment.

Product Overview

Product Name	USB Type-A to Micro-USB Cable
Cable Length	30 cm (approx. 11.8 in)
Connector 1	USB Type-A plug
Connector 2	Micro-USB Type-B plug (verify against the actual product)
Typical Functions	USB data connection and power connection, where supported
Typical Applications	Compatible mobile devices, development boards, accessories, and peripherals

Technical Specifications

Parameter	Specification
USB Host-Side Connector	USB Type-A
Device-Side Connector	Micro-USB Type-B (assumed)
Overall Cable Length	30 cm
Data Capability	Not specified; depends on cable wiring and product version
Current / Voltage Rating	Not specified by the supplied product name
Shielding / Conductor Gauge	Not specified

Features

• Short 30 cm length for compact setups and reduced cable clutter.

• USB Type-A to Micro-USB connection format.

• Suitable for charging and data transfer only when supported by the cable wiring and connected devices.

Notes

This document is a general product description prepared from the supplied item name, not a manufacturer-issued datasheet. Electrical ratings, USB data speed, shielding, wire gauge, and compliance details were not provided and should not be assumed. The term “Micro-USB AB” can be ambiguous; confirm the physical connector and exact USB specification with the supplier before ordering or publishing final technical claims.
