

## Tianmu 60gr Thermal Compound Grease Paste CPU Heatsink

### Description:

Tianmu 60gr Thermal Compound Grease Paste CPU Heatsink

*Brand:* Tianmu

*Thermal:* Silica

*Content:* 60 g / min (weight: about 75 g)

*Colloid Color:* White

Thermal compound improves the efficiency of a heat sink by filling microscopic air gaps that exists between the irregular surfaces of the CPU and the heat sink.

In other words, thermal compound increases the thermal conductivity between the CPU and the heat sink which ensures that your CPU runs cooler.

The thermal compound can be used on any combination of CPU and heat sink from PC to games console.

Thermal compound is an essential component for doing the XBOX 360 X-Clamp / RROD repair.

Technical Details as Follows:

*Temperature Range:* -50°C to 200°C

*Specific Resistance:* 1 x 10<sup>15</sup> Ohms/cm

*Dielectric Strength:* 18 kV/mm

What you will receive:

1 x Tube of Thermal Grease
