

WEMOS D1 MINI WS8212 RGB LED SHIELD

The WeMos WS2812B RGB Shield is a digital full colour (16777216 colour) RGB LED light source. It is specifically designed for the WeMos mini and mini Pro (see item HWEMO0002) ESP8266 based development boards. This shield includes two 8 pin headers (these will require soldering to the module) which will allow it to be easily inserted into the D1 minis headers. To control the LED the shield only requires one digital IO pin (D2).

Specification:

LED Size: 5050

Colours: 16777216

Voltage: 5V
