

XH-M189 TPA3116D2 Dual 50W Channel Stereo Digital Amplifier Board

Features:

With all-around protection system.

With power supply reverse connected protection.

With short circuit protection for horn output.

With the switch anti impact design.

Switch machine without "POP" sound.

Specifications:

Chip: TPA3116D2

Input voltage: DC 5-24V

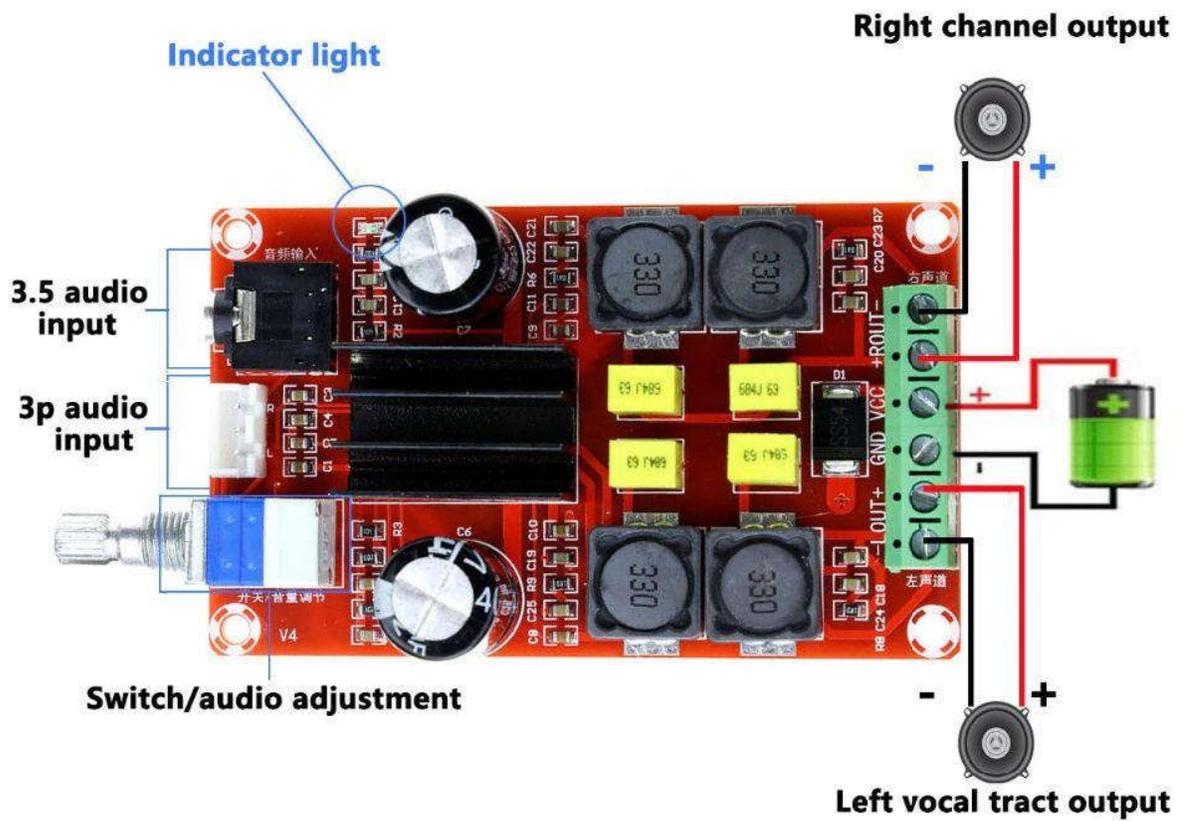

Output: max 50W dual channel

Working frequency: 20Hz-20KHz

Audio type: dual channel stereo

Protection: over-voltage, under-voltage, over-heat, short-circuit

Size: 84 x 51 x 29mm

Warm hint: the red line is the positive pole, the black line is negative, do not connect the reverse power and negative pole, please do not use the power and power size of the sound.
