

CC2530 programmer TTPROG-B

USB-powered Programmer TTPROG-B with Plug-and-play, 500mA Maximum Current and 150kbps Download Speed

Product Details

Brand Name :TRICOTECO

Origin: China (mainland)

Key Specifications/Special Features:

- Supports CC2430, CC2431, CC2530, CC2531, CC2510, CC2511 and C1110 or CC1111
- With IAR EW-8051 development environment seamlessly
- Downloading speed: up to 150kbps
- USB-powered, plug-and-play
- Maximum current: 500mA
- Simulation of first universal joints for 10 core
- Real-time online simulation, debugging
- Emulator debugs code simulation, programming, ZigBee protocol analysis (to be with development board with) in product
- Through USB interface to connect to computer, then connect to module containing CC2430/CC2431
- High-speed download with code, on-line debugging, breakpoints, single-step, variable observation and observation
