

CAM350 Reviews & Product Details

CAM350 Overview

What is CAM350?

CAM350 automates the PCB CAM engineering department by preparing and optimizing the design files for fabrication. Getting designs quickly through fabrication is a very complex process and effectively managing each operation is the key to moving into high-volume production. With a solution for every operation, CAM350 manages data input and preparation, through analysis, test, mill and drill to final bare-board production.
