

This CD ROM contains both white papers and product demonstrations or presentations from nine makers of EDA tools that run on the Windows NT platform: Accolade/SynaptiCAD, Exemplar Logic, interHDL, MyCAD, OrCAD, Synopsys, Synplicity, VeriBest, and Viewlogic. The disk also contains white papers on NT hardware and software platforms from Digital Equipment, Intel, and Microsoft, plus a presentation from Digital.

Integrated System Design invites you to read the white papers and sample the wares of the vendors who have contributed to this disk. We hope you find the information enlightening and useful.

If you have any comments on how we can make this disk better and more relevant to you, please contact Sarah Reid via e-mail at [sarah@isdmag.com](mailto:sarah@isdmag.com)
