

INDIUM HEAT-SPRING D THERMAL KIT IND# 4 1" SQ X 0.004"

MPN: KITEA-85350

Indium Heat-Spring D Thermal Kit Ind# 4 1" sq x 0.004" Qty 20 pcs - Kit is designed to provide excellent performance and reliability for precision soldering or bonding applications. Ideal for advanced manufacturing needs.

Product Information

Indium Heat-Spring D Thermal Kit Indalloy® #4 1" Square x 0.004" Qty 20 Pieces is a thermal interface kit containing 20 precision-cut preforms manufactured from 99.99% indium (Indalloy® #4). The kit is designed for applications requiring accurately sized thermal interface materials for electronic and industrial assemblies.

Each preform measures 1 inch square with a thickness of 0.004 inches and is manufactured to precise dimensional tolerances to support consistent placement and repeatable installation. Supplied as a convenient 20-piece kit, it provides an organised solution for prototype development, production and maintenance applications.

Key Features

- Heat-Spring D thermal interface kit
- Manufactured from Indalloy® #4 (99.99% indium)
- Contains 20 precision-cut preforms
- Preform size: 1" x 1"
- Thickness: 0.004"
- Manufactured to precise dimensional tolerances
- Suitable for thermal management applications

Typical Applications

- Electronic thermal management
- Power electronic assemblies
- Industrial equipment
- Prototype and production builds
- Maintenance and repair operations
- Precision engineering applications
