

CR-2032 Coin Cell Battery Holder Clip for PCB Mount, DIP, 20mm, Metal

- [Description](#)

CR-2032 Coin Cell Battery Holder Clip for PCB Mount, DIP, 20mm, Metal

Introduction:

The CR-2032 Coin Cell Battery Holder Clip is a reliable solution for securely mounting a 20mm lithium coin cell on your printed circuit board (PCB). Designed for DIP (Dual In-line Package) mounting, this clip provides a firm, low-profile connection, making it ideal for a wide range of electronic devices. Its durable metal construction ensures a stable power supply and excellent conductivity for your CR2032 battery. Whether you're working on a new project or repairing an existing one, this easy-to-use holder offers a safe and dependable way to integrate power into your circuit.

Features:

- Securely holds a 20mm CR-2032 coin cell.
- DIP mounting for easy PCB installation.
- Durable metal construction ensures longevity.
- Low-profile design saves space on your board.
- Provides reliable power for your device.

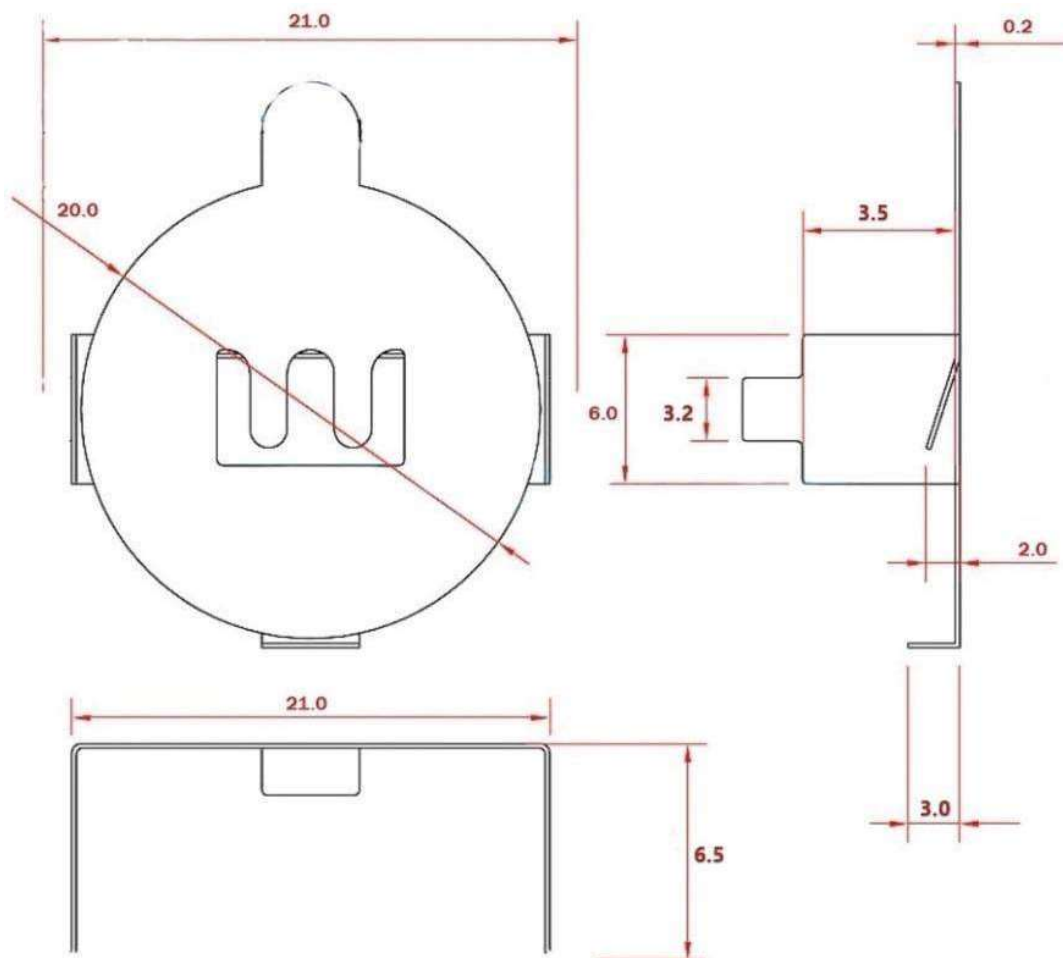

Main Specifications:

Part Number:	YC-MY-2032-21	
Product Type:	Coin Cell Battery Clip	
Applied Battery Type:	CR2032	
Contact Material:	Phosphor Bronze	
Contact Finish:	Ni Plating	

Applications of this CR-2032 Coin Cell Battery Holder Clip

- **Small electronics:** calculators, digital watches and clocks, remote controls
- **Medical and Health Devices:** hearing aids, glucose meters, thermometers
- **Toys and Novelties:** LED-powered novelties, electronic toys, singing greeting cards
- **Computer and Memory Backup:** motherboards, data loggers, memory backup
