

MOLEX 4-PIN FEMALE TO JST XH CONNECTOR

Description

When 0.1" is too big, and JST PH's too chunky, this ultra-slim 1.25mm connector cable is a reliable alternative. These are 1.25mm pitch but have a nice clicky connection.

This cable is handy and not too long, 20cm in fact. The friction lock makes easy-breezy connections whenever you need light and small connectivity.

Note that this cable is 1:1 'symmetric' type wiring, which means that on a 4-pin cable, for example, the first pin on one connector will go to pin 1 on the other side, pin 2 to pin 2, etc till the last two pins.

In need of both an inline socket and plug connector? We also carry this as a [cable matching pair](#). The two match with each other and with any Molex PicoBlade compatible connectors.

Technical Details

- Length (including connectors): approx 20cm
- Connector Pitch: 1.25mm
- Wire Gauge: 28 AWG
