

SI-3000P Series**3-Terminal, Dropper Type****■Features**

- TO-3P package 3-terminal regulator
- Output current: 2.0A
- Wide range of DC input voltage
- Built-in foldback overcurrent protection circuit

■Applications

- For stabilization of the secondary stage of switching power supplies
- Electronic equipment

**■Absolute Maximum Ratings**

(Ta=25°C)

Parameter	Symbol	Ratings						Unit		
DC Input Voltage	V _{IN}	45						V		
DC Output Current	I _O	2.0						A		
Power Dissipation	P _{D1}	50(Tc=25°C)						W		
	P _{D2}	2.0(Without heatsink, stand-alone operation)						W		
Junction Temperature	T _j	-30 to +125						°C		
Ambient Operating Temperature	T _{op}	-20 to +80						°C		
Storage Temperature	T _{stg}	-30 to +125						°C		
Thermal Resistance (junction to case)	R _{th(j-c)}	2.0						°C/W

■Outline Drawing

(unit:mm)

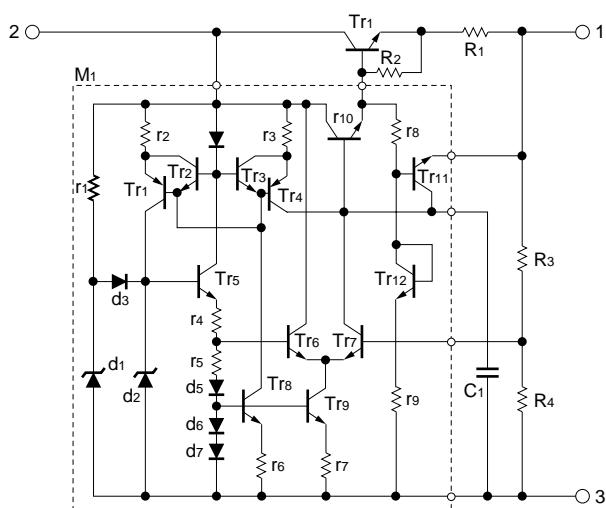

Plastic Mold Package Type (TO-3P)

Flammability: UL94V-0

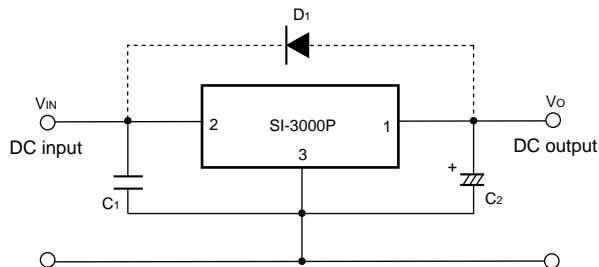

Weight: Approx. 6g

Terminal Connections

- ① Output
- ② Input (backside of case)
- ③ Ground

■Block Diagram

■Standard External Circuit

C1: Oscillation prevention capacitor (approx. 0.33μF)
Connection to terminal No.2 must be made as short as possible.

C2: Output capacitor (47 to 100μF)
Connection to terminal No.1 must be made as short as possible.

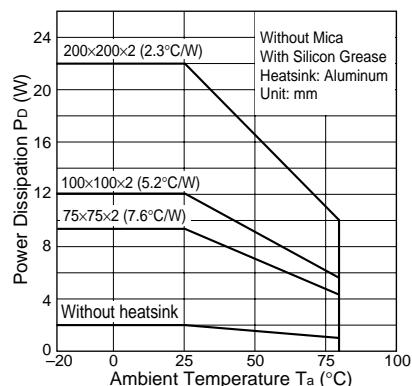

D1: Protection diode (RM1Z)
Required for protection against reverse biasing of input and output.

Note 1: Connect a 47μF to 100μF capacitor to both sides of the load if the wiring between the output terminal and the load is long.

Note 2: An isolation type diode is provided from input to ground and also from output to ground. These may be destroyed if the device is reverse biased. In this case, use a diode with low VF to protect them.

Note 3: The output voltage may not be adjusted by raising the ground voltage (using a diode or resistor).

■Ta-PD Characteristics

■Typical Characteristics

($T_a=25^\circ\text{C}$)
