## CALCOIL

CALCOIL is a freeware Windows program for WIN95/98/NT. Fell free to copy and distribute the program, as you want.

With the program CALCOIL, the computer can calculate the number of turns to obtain a given inductance in air core circular coils of one layer, or multilayers. Given the dimensions of an existing coil, the program can also calculate the inductance and guess the number of turns.

### Installation:

Unzip the file CALCOIL.ZIP to a temporary directory and run setup.exe to make the installation in your hard drive.

If you find any bug, please send an email to the author ([ffalmeida@mail.telepac.pt](mailto:ffalmeida@mail.telepac.pt)).
