

## Meaning of mobile phone cable, charger, headphone label

Applicable Products: Mobile phones

Applicable versions: No system version is involved

### Charger label

- **"Model"**: The specifications of the phone charger. For example, HW-090200CH0 is a 9V/2A charger (underlined with the corresponding xxV/xxA).
- **3C certification**: 3C certification is a product conformity assessment system implemented by the Chinese government to protect consumer safety and national security, strengthen product quality management, and comply with laws and regulations.
- **Energy efficiency certification**: The international energy efficiency level standard for external power adapters, the higher the level, the higher the conversion efficiency of the power adapter.
- **Double insulation**: with working insulation (basic insulation) and protective insulation (additional insulation). Protective insulation is the insulation used to prevent electric shock when the working insulation is damaged.
- **QR code**: This QR code is used for internal traceability by Huawei, which is the same as Huawei's internal serial number, and the APP that scans the QR code cannot associate the corresponding product information.

### Headphone tab

**Alphanumeric and QR code on the outer packaging of the headphones:** The alphanumeric numbers are Huawei's internal manufacturer code headphone model, and the QR code is scanned as the SN number.
