

# MONO RCA MALE TO TWO RCA FEMALE AUDIO SPLITTER

## Specification

1. 100% branded and new product
2. Dual splitter single RCA male to two RCA female
3. Contact material : high quality copper
4. Prevent data fluctuation
5. High carbon steel body with silver plating
6. Hard plastic insulation on top and inside

## Description

This is a splitter connector. It helps to modify the input audio data into two outputs. This connector contains a single input RCA male pin. The output comes from two RCA female connectors. This is widely used in our daily life such as home theaters, speakers, etc. This connector is built from high carbon steel with nickel plating. Hard plastic insulation covers the top and inside part of the connector. The contact material is high-quality copper which helps to prevent data fluctuation. It is durable, easy to use, and can also work in high room temp.

## Package includes

This is the pack of a single piece of Single RCA male to 2 RCA female dual splitter interface audio connector

## Features

1. Prevent data fluctuation
2. Use to modify the input audio data
3. Can work in high temperature
