

# IC Storage Box

## 24 Grids Plastic Electronic Component/ IC Storage Box

### About this Item

You can use this box to store all the small parts, like the IC chips, capacitors, resistors, small screws, nuts, washers, and lock washers etc. The special designed ambient profiles ensure a secured connection with other boxes of the same or different sizes. This feature enables you to make your own box in any configuration you want.

This a pretty good plastic case for you to store a lot of ICs chips, suitable for most kinds of chips

Use this large-sized plastic box to store components. This box is perfect for storing resistors, capacitors, LEDs, connectors, etc.

### Description:

If you like to build electronics projects, you know it is very important to have your electronics components organized. This plastic case provides some features so that you always find the right components in no time.

This storage box is made of transparent pp/ plastic, environmental, durable and odorless.

Applications:

electronic parts, loom bands, earrings, necklaces, beads, finger rings or other small jewelry, fishing hook, fish lure bait crafts, nails, nuts, and bolts, Medicine ...

**Feature:**

- ✓ Product: Storage Box
- ✓ Material: Polypropylene (PP)
- ✓ Size: 19.2 \* 13.2 \* 2.3 cm
- ✓ 24 Compartments
- ✓ Transparent materials, so you can see through into it.

**Usage:**

- Flip over the cap to open, **chips, most general small DIP items** can store in a good protected condition
- SMD raw items like **0805 resistor** you can leave in it, it won't comes out but just be aware when you open it
- Remove the separator, you can store **a short strip of SMD items**
- Plastic Box Dimension: 192 x 132 x 23mm
- Dividers included
- Transparent
