

TJKJ TCON V1.2

Based on the search results, I can now confirm that "TJKJ TCON V1.2" is a specific **programmer tool** used for repairing LCD screens

Here's a summary of what this tool is known to be:

- **Device Type:** It is a "Tcon Programmer" (Timing Controller programmer). Technicians use this piece of equipment to read, write, or repair the firmware on a display's logic board.
- **Full Identifier:** The complete name for the tool is often listed as TJKJ-VGH VGL-V1.2
- **Related Components:** The tool is designed to interface with the circuits responsible for generating the **VGH** and **VGL** voltages we discussed earlier, which are the critical turn-on and turn-off voltages for the screen.

This clarifies that your earlier code (TJKJ-A1 VGH VGL C602) is likely the **target board** (a specific logic board with a component C602), while TJKJ TCON V1.2 is the **programming tool** used to service that board.

If you are planning to use this tool for a repair, I can help you look for specific instructions or a user manual.

TJKJ-VGH/VGL-V1.2 tcon programmer
Read 1 web page

Based on the search results, I have located the specific programmer you are asking about.

The "**TJKJ-VGH/VGL-V1.2**" is commercially listed as a specialized tool for LCD repair, often referred to as a "**Tcon Programmer**"

Here is the information regarding its specifications and availability:

- **Product Name:** TJKJ-VGH VGL-V1.2 Tcon programmer

Purpose: Specifically designed for reading, writing, or repairing the firmware on Tcon (Timing Controller) logic boards to fix VGH/VGL voltage-related screen issues

- .

If you plan to purchase this tool, would you like me to look for specific usage instructions or a user manual?
