

USB WiFi Router

3G LTE USB Portable WiFi Router, Smart Router 150Mbps, Wireless Network Smart Router with SIM Card Slot, Plug and Play, High Speed Portable Travel Hotspot for Car Outdoor Use

Product Description

The cellular USB WiFi hotspot is a simple way to provide your CANedge2 WiFi CAN logger with a 3G access point. Insert your SIM card, add the SSID/password in the CANedge2 config - and power the hotspot.

The hotspot can be powered via any standard USB power supply (e.g. in a vehicle) or it can be optionally powered via the CANedge2 2nd port via a DB9-USB adapter. In the latter case you can still log data from both CANedge2 channels by using a DB9-Y-splitter.

Features

- **PLUG & PLAY:** Add your SIM & configure your CANedge2 with the hotspot name/pass
- **ON-THE-ROAD:** Transfer CAN data via 3G from vehicles while on-the-road
- **SMALL & EASY:** Power e.g. via the CANedge2 2nd port using a DB9-USB adapter
- **CONSISTENCY:** Avoid dealing with WLAN firewalls & ports at e.g. client end user sites
- **1-10 DEVICES:** Connect up to 10 devices for optimal data plan use
- **UNLOCKED:** Simply add your own SIM card with your preferred data plan

Specifications

Antennas

- Built-in 3G & WIFI antenna
- WIFI antenna gain: -1 dbi (3G: -1.5 dbi)

Certifications

CE/RoHS

Dimensions

8.2 x 2.6 x 0.8 cm (3.2 x 1.0 x 0.3 in)

Frequency

WiFi: 2412MHz-2472MHz

Power

- Powered via USB - e.g. in your vehicle
- Voltage: 5V, Power Consumption: <3W

Product Weight

16g (0.04 lb)

Temperature Range

- **Operating:** -10°C to 45°C (14°F to +113°F)
- **Storage:** -20°C to 75°C (-4°F to +167°F)
