Overview:

GeIL Inc., the independent world leader in professional memory houses, DDR2 800MHz memory modules - an extent to its previous DDR2 667MHz module with wider bandwidth and tighter timings that set the standard in its competitive. This module offers 800MHz SDRAM DDR2 DIMMs in single channel, giving it the highest performing potential.

The GeIL DDR2 Memory Module Offers Faster Speeds, Greater Bandwidths, Lower Power Consumption and Enhanced Thermal Performance .

All of GeIL's DDR2 modules have been test ed extensively in multiple DDR2 motherboards to ensure compatibility and performance at its rated speed. GeIL is proud to be recognized by providing the best performance and best value currently available in DDR2 memory directly to end-users.

Specifications:

- Available CAS: 5-5-5
- 240 pin, Non-ECC, Un-buffered DIMM
- Working Voltage 1.8V
- Aluminum Heat-spreader
- DBT Die-hard Burn-in Technology) Enhanced
