The GSM/GPRS Modem uses SIM900A based Dual band 900/1800MHz GSM / GPRS modem. It can be connected to a microcontroller UART using TTL levels. It accepts external voltage 5VDC 2A as input.

- SIMCOM industrial-level module: SIM900A.
- 1000UF high quality tantalum capacitors, powerful filter power.
- TVS anti-surge anti-interference circuit is suitable for industrial situations.
- Curved wiring + high performance antenna, the signal is very strong.
- Gold-plated connection (IPX) with good contact performance.
- Welding process of industrial grade patch, stable welding spot.
- Anti-static and shock-proof bubble bag packaging, transportation safety.

Working Functions:

- Voice call function — telephone alarm.
- Receiving – sending SMS messages – SMS controller, SMS alarm.
- GPRS function – communicate with the server and send and receive data through traffic.
- MMS function – MMS send pictures, security and only home suitable for use.
- DTMF function – resolve the key value of each other in the call and remote control of the phone.
- TTS function – speech synthesis (need to contact us

Package Includes:

- 1 x SIM900A GPRS GSM module
